Plant and Soil **145**: 305–307, 1992.

Contents of Volume 145 1992

Volume 145, No. 1

C. Barford and K. Latjha, Nitrification and nitrate reductase activity along a secondary successional gradient 1

A. Sarniguet and P. Lucas, Evaluation of populations of fluorescent pseudomonads related to decline of take-all patch on turfgrass 11

A. Sarniguet, P. Lucas and M. Lucas, Relationships between take-all, soil conduciveness to the disease, populations of fluorescent pseudomonads and nitrogen fertilizers 17

A. Sarniguet, P. Lucas, M. Lucas and R. Samson, Soil conduciveness to take-all of wheat: Influence of the nitrogen fertilizers on the structure of populations of fluorescent pseudomonads 29

W. J. Middelhoven, M. Koorevaar and G. W. Schuur, Degradation of benzene compounds by yeasts in acidic soils 37

D. Neilsen, G. H. Neilsen, A. H. Sinclair and D. J. Linehan, Soil phosphorus status, pH and the manganese nutrition of wheat 45

K. Vlassak, L. van Holm, L. Duchateau, J. Vanderleyden and R. de Mot, Isolation and characterization of fluorescent *Pseudomonas* associated with the roots of rice and banana grown in Sri Lanka 51

G. Tyler, Inability to solubilize phosphate in limestone soils – key factor controlling calcifuge habit of plants 65

L. M. Haugen and S. E. Smith, The effect of high temperature and fallow period on infection of mung bean and cashew roots by the vesicular-arbuscular mycorrhizal fungus *Glomus intraradices* 71

M. P. N. Gent, Effect of planting date, ventilation and soil temperature on growth and nutrition of tomato in high tunnels 81

R. C. Ellis and P. I. Pennington, Factors affecting the growth of *Eucalyptus delegatensis* seedlings in inhibitory forest and grassland soils 93

M. A. Adams and J. S. Pate, Availability of organic and inorganic forms of phosphorus to lupins *(Lupinus* spp.) 107

P. Devidas and L. A. Rehberger, The effects of exotoxin (Thuringiensin) from *Bacillus thuringiensis* on *Meloidogyne incognita* and *Caenorhabditis elegans* 115

J. Caron, B. D. Kay and E. Perfect, Short-term decrease in soil structural stability following bromegrass establishment on a clay loam soil 121

W. L. Weerakoon, G. Seneviratne, M. A. P. de Silva and A. M. Seneviratne, Evaluation of *Sesbania speciosa* as a green manure for lowland rice in the dry zone, Sri Lanka 131

A. Blum and J. W. Johnson, Transfer of water from roots into dry soil and the effect on wheat water relations and growth 141

Short communication

R. M. Boddey and S. Urquiaga, Calculations and assumptions involved in the use of the 'A-value' and ^{15}N isotope dilution techniques for the estimation of the contribution of plant-associated biological N_2 fixation 151

Volume 145, No. 2

P. S. Nobel and M. Cui, Prediction and measurement of gap water vapor conductance for roots located concentrically and eccentrically in air gaps 157
P. H. Williams and R. J. Haynes, Transformations and plant uptake of urine-sulphate in urine-affected areas of pasture soil 167
S. D. Hamilton, P. M. Chalk, C. J. Smith and P. Hopmans, Evaluation of reference plants by labelling with ^{35}S in the estimation of N_2 fixation by ^{15}N isotope dilution 177
M. A. Hamza and L. A. G. Aylmore, Soil solute concentration and water uptake by single lupin and radish plant roots. I. Water extraction and solute accumulation 187
M. A. Hamza and L. A. G. Aylmore, Soil solute concentration and water uptake by single lupin and radish plant roots. II. Driving forces and resistances 197
J. E. Hooker, M. Munro and D. Atkinson, Vesicular-arbuscular mycorrhizal fungi induced alteration in poplar root system morphology 207
J. G. Langelaan and S. R. Troelstra, Growth, chemical composition, and nitrate reductase activity of *Rumex* species in relation to form and level of N supply 215
A. Ikram, A. W. Mahmud, M. N. Ghani, M. T. Ibrahim and A. B. Zainal, Field nursery inoculation of *Hevea brasiliensis* Muell. Arg. seedling rootstock with vesicular-arbuscular mycorrhizal (VAM) fungi 231
J. V. Colpaert and J. A. van Assche, The effects of cadmium and the cadmium-zinc interaction on the axenic growth of ectomycorrhizal fungi 237
A. G. Bengough, C. J. Mackenzie and A. J. Diggle, Relations between root length densities and root intersections with horizontal and vertical planes using root growth modelling in 3-dimensions 245
M. Tagliavini and B. Marangoni, Growth of peach as affected by decomposition of own root residues in soil 253
S. Ruppel, C. Hecht-Buchholz, R. Remus, U. Ortmann and R. Schmelzer, Settlement of the diazotrophic, phytoeffective bacterial strain *Pantoea agglomerans* on and within winter wheat: An investigation using ELISA and transmission electron microscopy 261
G. B. Teaney III and J. J. Fuhrmann, Soybean response to nodulation by bradyrhizobia differing in rhizobitoxine phenotype 275
S. Deiana, C. Gessa, B. Manunza, M. Marchetti and M. Usai, Mechanism and stoichiometry of the redox reaction between iron (III) and caffeic acid 287

Short communications

A. L. P. Cairns and J. H. Kritzinger, The effect of molybdenum on seed dormancy in wheat 295
M. D. Parra-Garcia, V. L. Giudice and J. A. Ocampo, Absence of VA colonization in *Oxalis pes-caprae* inoculated with *Glomus mosseae* 298
